Summary

Data analyst with internship experience in Power BI, SQL, Python and Tableau: building dashboards, preparing data and validating reports. English fluent, Portuguese B2.

Experience

Data Analyst / BI Intern July 2025 – November 2025
BenGen (Benevolent Generation LLC), remote

- Built and maintained the Power BI datasets on FastCube, BenGen's internal data platform, joining 10+ sources such as Everflow, ZeroBounce, HubSpot and Stripe, so three business teams worked from the same numbers.
- Kept 5 data models and 10 report pages on offers, publisher revenue, conversions, email activity and demographics refreshing daily and hourly, so the numbers were current each morning.
- Wrote SQL and Python checks in Databricks across 15 tables, including the 1.4 billion row profile table: row counts, distinct ids and null flags, so bad loads did not reach the reports.

Scientific Initiation Intern September 2023 – February 2024
Centro de Investigação de Montanha (CIMO), Bragança

- Cleaned and analysed data from 220+ lab plates across five pathogens in Microsoft Excel: averages, growth-inhibition rates, EC50 values and ANOVA.
- Presented to a research jury: up to 96.69% growth inhibition, with recommendations for further trials.

Projects

Hotel Revenue and Cancellation Analytics Power BI, DAX, Power Query, SQL, Python

- Five-page Power BI report on 119,390 hotel bookings. Prepared the data with SQL and Python into a star schema with a date dimension, four dimensions and 43 documented DAX measures.
- Fixed an occupancy formula that showed 100% every month. Found 57.0% cancellation for bookings made 181+ days ahead against 37.0% overall. Based the overbooking calculator on late cancellations only (8.5% at the city hotel).

Executive Sales Performance Dashboard Tableau, SQL, Python

- Cleaned and joined 10,000+ sales records with SQL and Python, with tests on row counts and growth figures, then built an executive page with parameters, calculated fields, a dual-axis chart and a map that filters the page.
- Found 36.2% sales growth and 30.9% profit growth against 6.0% customer growth. A split by customer showed returning customers who spent more added $497k and only 5 were new, so I recommended retention and upselling.

Education

BSc in Chemical Engineering September 2021 – September 2024
Polytechnic Institute of Bragança, Portugal

Certifications

Google Analytics Certification, Google

Databricks Fundamentals Accreditation, Databricks

SQL Analytics and BI on Databricks, Databricks

Skills

Analytics and BI: Power BI, DAX, Power Query, Tableau, dashboards, KPI reporting

Data: SQL, Python, Databricks, BigQuery, Microsoft Excel (PivotTables, XLOOKUP), ETL

Modelling: star schema, fact and dimension tables, date dimensions, time intelligence
